

Using the Phases of the Moon in Planting

behappyanddogood.com

New Moon

The LIGHT of the moon goes from new moon until full moon, including the first quarter.

This is the time to plant all above-ground plants like flowers, beans, tomatoes, corn, wheat, trees, etc.

Full Moon

The DARK of the moon goes from full moon until new moon, including the last quarter.

This is the time to plant all below-ground plants like onions, radishes, beets, carrots, potatoes, etc. This is also the time to kill weeds.
